Hazardous Weather

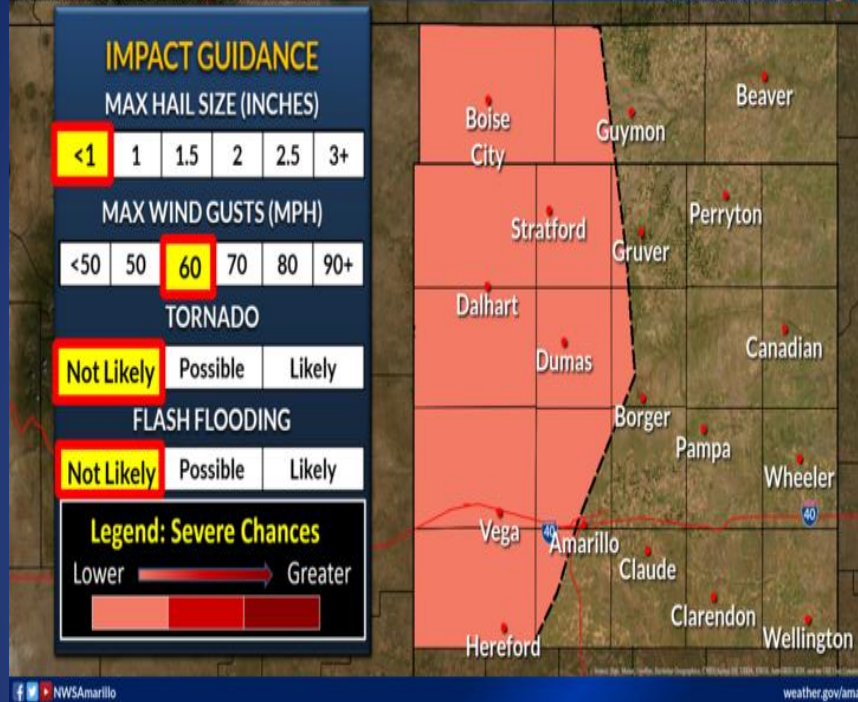

Hazardous Weather

Severe Thunderstorm Potential - Saturday

Thunderstorms that go severe could mainly be a wind threat.

Weather Forecast Office
Amarillo, TX
Issued Jul 01, 2023 1:20 AM CDT

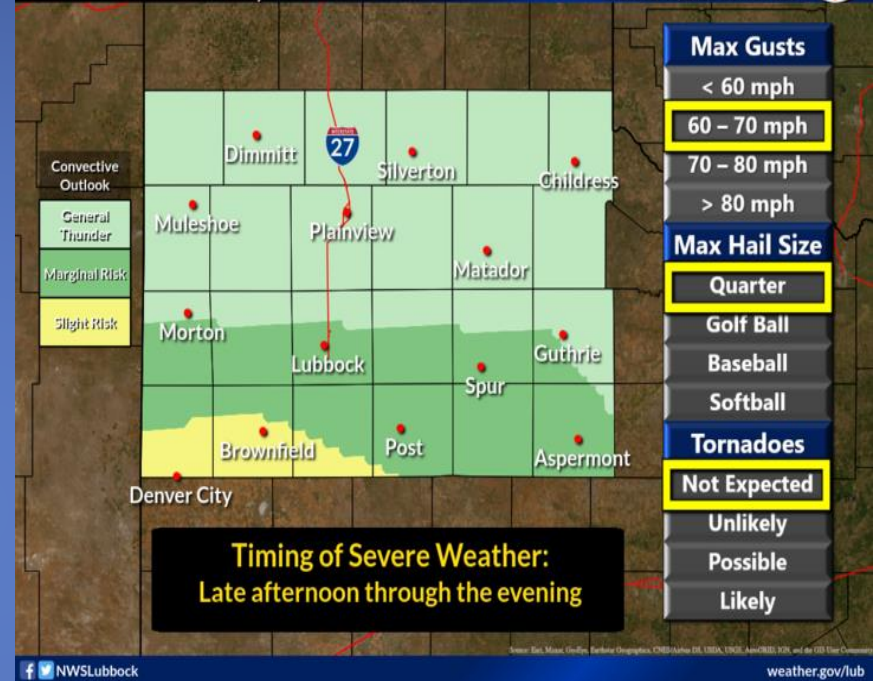

Strong to severe storms will be possible on Sunday across the western Panhandles. The current forecast suggests that storms will mainly be a wind threat, but some small hail will be possible as well.

Severe Weather Outlook

Severe Weather Risk Level for Today

Weather Forecast Office
Lubbock, TX
Issued Jul 01, 2023 4:04 AM CDT

Strong to marginally severe thunderstorms are possible across the southern South Plains and southern Rolling Plains later this afternoon into the evening. Strong outflow wind gusts up to 70 MPH and hail up to the size of quarters are the primary concern. Periods of heavy rainfall could also lead to localized flash flooding.

Hazardous Weather

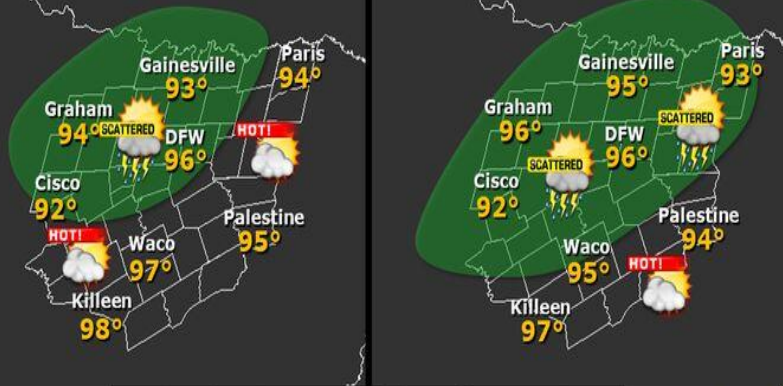

Scattered Storms This Weekend

Weather Forecast Office
Fort Worth, TX
Issued July 1, 2023 3:11 AM CT

Today

Sunday

Nearby storms could produce gusty outflow winds and frequent lightning.

[f](#) [t](#) [v](#) NWSFortWorth

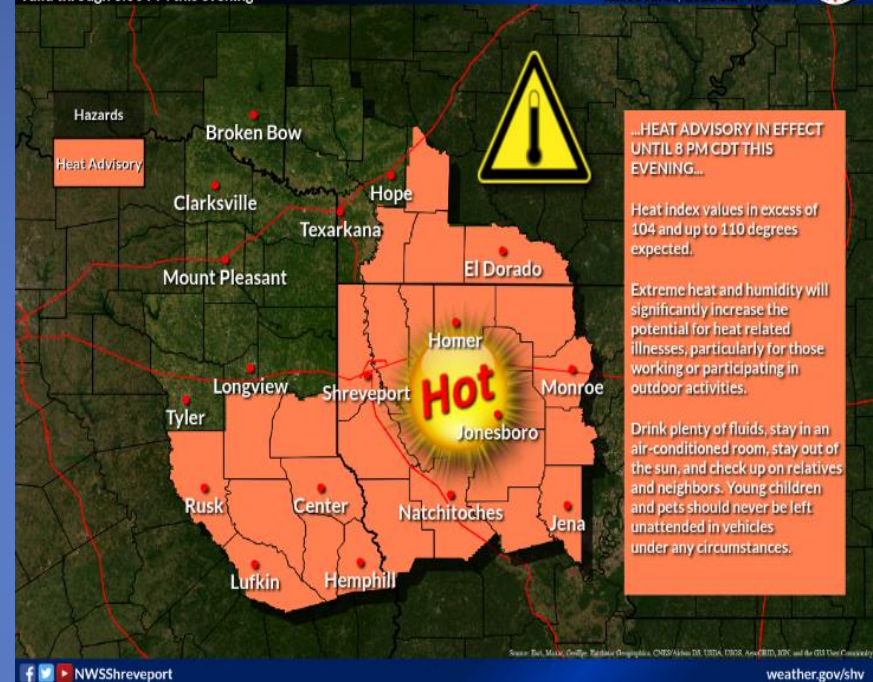

weather.gov/fortworth

Scattered thunderstorms are possible today and tomorrow, especially across portions of North Texas. Even if not storming at your location, nearby storms could produce gusty outflow winds and frequent lightning. Highs will be in the mid and upper 90s.

Heat Advisory in effect Today

Valid through 8:00 PM this evening

Weather Forecast Office
Shreveport, LA
Issued Jul 01, 2023 3:29 AM CDT

[f](#) [t](#) [v](#) NWSShreveport

weather.gov/shv

A Heat Advisory will be in effect until 8:00 PM tonight for the shaded counties and parishes, where heat index values will exceed 104 degrees.

Hazardous Weather

Excessive Heat Warning and Heat Advisory Saturday

11am through 7pm CDT

✓ **Key Message**

Dangerous heat with heat index values at or above 113° within the **Excessive Heat Warning** area and up to 112° for locations within the **Heat Advisory**.

⚠ **Hazards**

- Heat Exhaustion
- Heat Stroke
- Dehydration

📢 **Actions**

Never leave kids or pets in the car

Check on the elderly

Drink plenty of water

National Oceanic and Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Lake Charles, LA

The depressive and hot high pressure regime will be on the way out the door Sunday. Isolated showers and thunderstorms will be possible, primarily over the Atchafalaya Basin, with partly sunny skies elsewhere. Temperatures should top out in the low 90s at the coastline and upper 90s else where with heat indices 105 to 110.

Dangerous Heat Today

Heat Advisory in effect through 7pm CDT Saturday

Weather Forecast Office
Houston/Galveston TX
Issued Jul 01, 2023 1:51 AM CDT

HEAT ADVISORY
In effect through 7pm CDT Saturday

- Heat index values greater than 108 degrees

IMPACTS & ACTIONS

- Heat-related illnesses possible for those in strenuous outdoor activities or with no A/C
- Drink plenty of water
- Limit outdoor activities
- Work early or late in the day
- Wear light clothing
- Wear sunscreen
- Check on family and pets

weather.gov/hgx

A Heat Advisory is in effect for portions of Southeast Texas through 7pm CDT Saturday. Continue to practice heat safety!

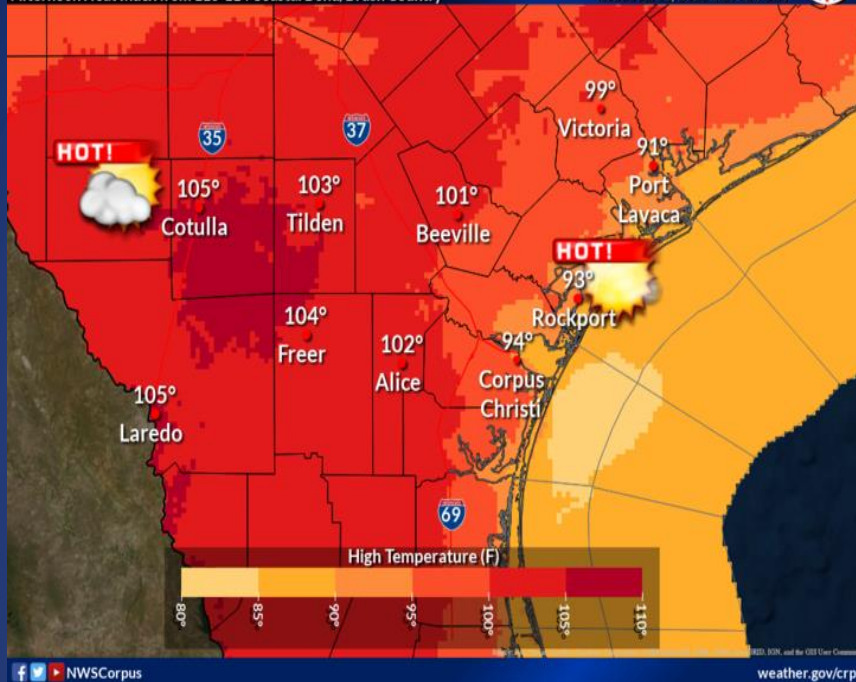

Hazardous Weather

Dangerous Heat Again Today

Afternoon Heat Index from 110-114 Coastal Bend/Brush Country

Weather Forecast Office
Corpus Christi, TX

Issued Jul 01, 2023 4:29 AM CDT

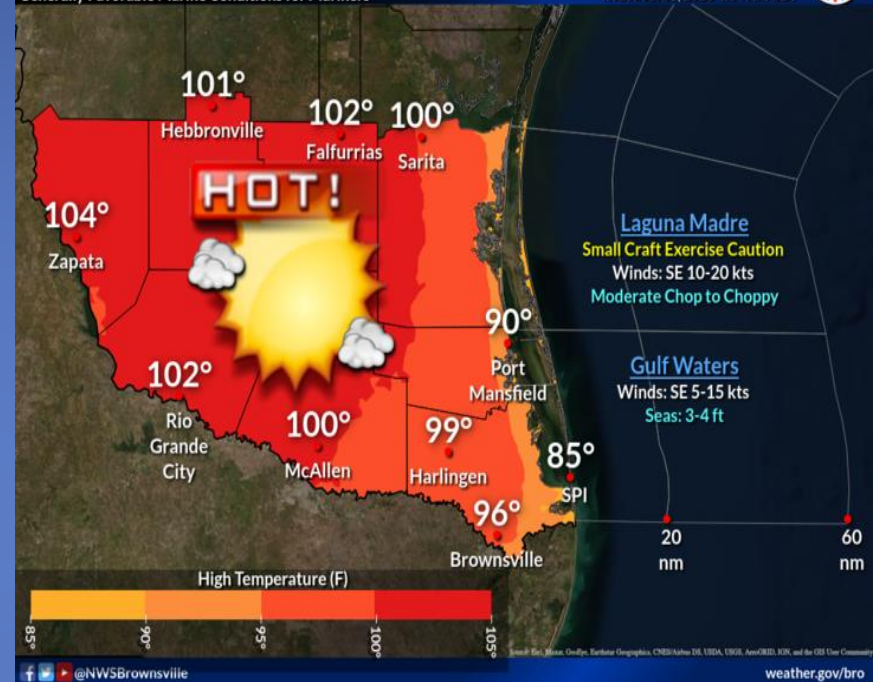

Dangerous heat will continue for most of South Texas today with high temperatures ranging from the upper 80s along the coast to around 105 degrees over the western Brush Country. Afternoon heat index values will range from 110 to 114 over the Coastal Bend and Brush Country. Mostly cloudy skies will occur over the inland areas early this morning. Otherwise, mostly sunny skies will be in store today.

Today | More of the Same

Generally Favorable Marine Conditions for Mariners

Weather Forecast Office
Brownsville/RGV, TX

Issued Jul 01, 2023 4:04 AM CDT

High pressure in the middle layers of the atmosphere will produce yet another day of dry weather with hot daytime high temperatures. Meanwhile, along the Lower Texas Coast, mariners can expect light to moderate winds and moderate seas.

Hazardous Weather

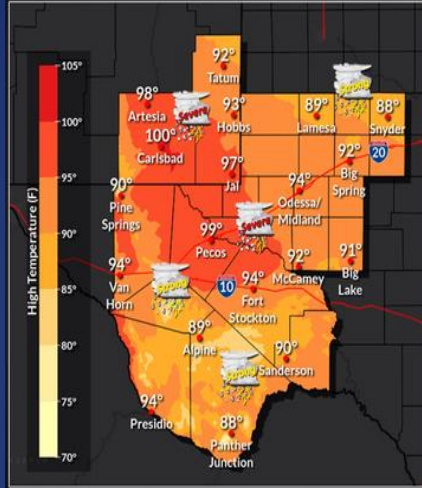

Weekend Outlook

Not as hot with afternoon and evening thunderstorms.

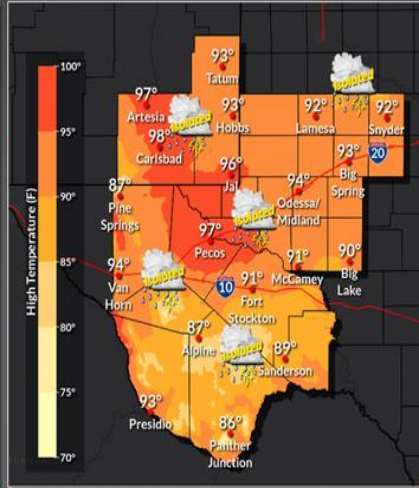

Weather Forecast Office
Midland/Odessa, TX
Issued July 1, 2023 4:37 AM CT

Saturday

Sunday

f t @NWSMidland

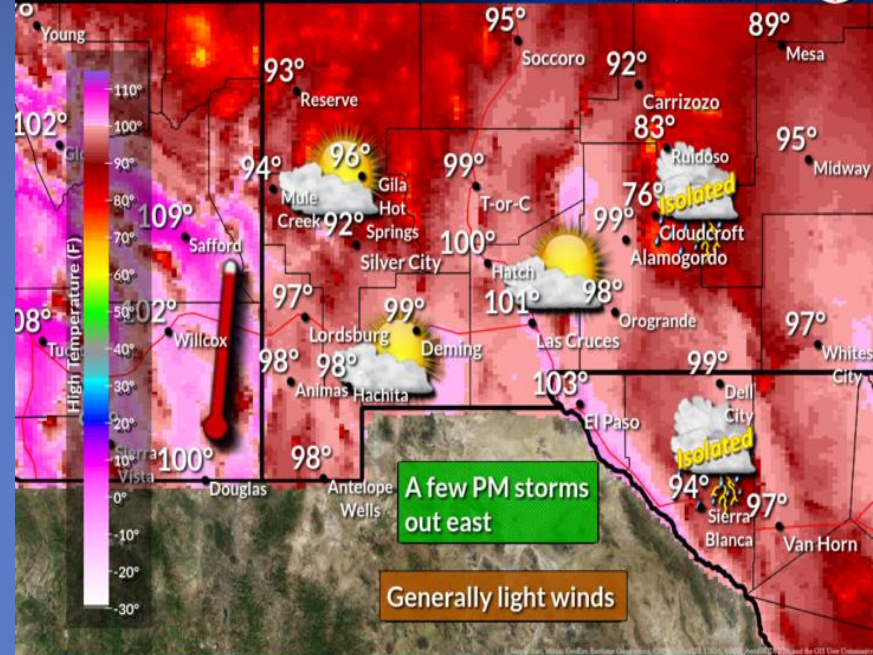

weather.gov/maf

Temperatures during the afternoon remain not as hot as they have been as most locations see temperatures in the 90s. Primarily isolated thunderstorms are possible each afternoon and evening across the region. Strong to severe thunderstorms will be possible this afternoon. The primary hazards with any severe thunderstorms will be large hail and damaging winds.

Saturday's Outlook

The Heat Continues...

Weather Forecast Office
El Paso, TX
Issued Jun 30, 2023 6:23 PM MDT

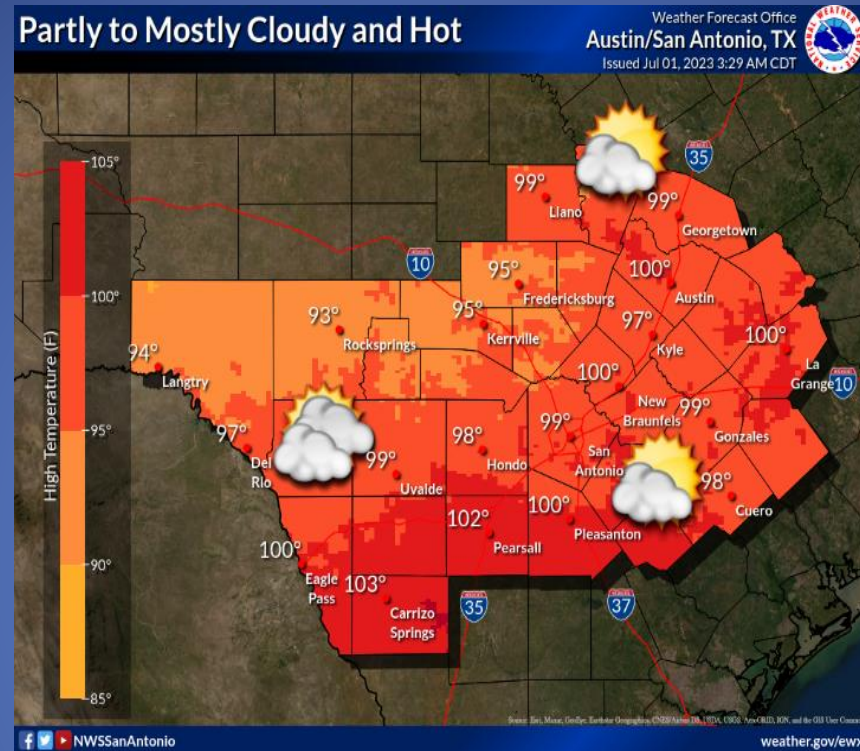

f t @NWSEIPaso

weather.gov/EIPaso

Another hot day is expected to kick off July with mainly dry conditions. However, isolated storms may develop in far eastern areas during the afternoon with some strong winds possible. Gusty outflows may progress westward during the evening hours from activity further east.

Hazardous Weather

Another hot day expected under partly to mostly cloudy skies. Highs today will be a couple of degrees lower than yesterday ranging from the middle 90s to 103.
